

# Community Counterdrug Plan

**Health Promotion / Prevention Plan**

- Show support for community services that contribute to healthy lifestyles.
- Support universal messaging to educate community about risks of substance abuse, and benefits of positive and healthy programming.
- Provide drug education training to various sectors.

**Intervention Contingency Plan**

- Identify local conditions that aggravate root causes of specific substances of abuse and apply known interventions to affect those conditions.
- Identify training and best practices for those that interface with large numbers of the community to support one-on-one, brief interventions.

**Recovery Support Plan**

- Identify services that support ongoing recovery such as peer support groups.
- Identify services that continue to address the aggravators that caused initial substance abuse and provide support.
- Identify assets in the community that positively contribute to ongoing recovery.

**Access to Treatment Plan**

- Identify services available to treat specific addictions.
- Identify services that can address the aggravators that reduce the effect of treatment.
- Identify challenges that might prevent an individual from accessing treatment.
- Identify assets in the community that positively contribute to effective treatment.

## COALITION PLANNING TO ADDRESS SUBSTANCE MISUSE
